

POWER AMPLIFIER PENTODES

TYPES

6760 AND 6761

(JUNE 2, 1955)

Types 6760 and 6761 are in the miniature 9-pin construction. They are designed for longlife operation and reliable service under vibration conditions. The tubes are intended for use as output tubes in telephone equipments and industrial applications, especially in broad-band amplifiers. Except for heater ratings the 6760 is identical with the 6761.
